SOIL

COUNT

Nm 34.000

COMPOSITION

- ACETATE 88%
- POLYAMIDE(NYLON) 12%

GAUGE

- 16G-1P
- 18G-1P

TYPE OF YARN

- STRAIGHT
- STRETCH

COLOR STOCKS

- ALL COLOR STOCK SERVICE
- OWN COLOR MINIMUM:5KG

DESCRIPTION

SOIL is an acetate stretch yarn with luxurious brightness.
Acetate is a semi-synthetic fiber made with spun filaments of cellulose taken from wood pulp. The acetate used for this yarn is a combination of this cellulose and acetic acid.
For SOIL, a bright di-acetate is used for its silk-like luster and reduced clinging. Please note that the shine will be affected by friction. We recommend the use of a laundry net when washing. As SOIL is prone to color bleeding, avoid using light and dark colors beside each other.

EASY CARE 手洗い可 | STRETCH ストレッチ | ICE TOUCH 接触冷感 | RECYCLE | naia™ from Eastman

WASHING INSTRUCTION

Note: – Handwashing is recommended with cleaning net.
