- POLYAMIDE(NYLON) 39%

GAUGE

- 16G-2P

TYPE OF YARN

- STRAIGHT

COLOR STOCKS

- ALL COLOR STOCK SERVICE

DESCRIPTION

BB CORE63 is a core spun stretch yarn that uses stretch nylon for the core and micro Bemberg for the outer fiber. Micro Bemberg uses an extra fine fiber structure.

In comparison to regular core yarn, the cotton denier is finer so it has very soft smooth qualities.

This soft yarn is twisted tightly to prevent loose fibers and a matt surface. The refined stitches are unique to this yarn.
