GAUGE

- 12G-1P
- 14G-1P

TYPE OF YARN

- STRAIGHT

COLOR STOCKS

- ALL COLOR STOCK SERVICE
- OWN COLOR MINIMUM:3KG

DESCRIPTION

LINEN SHOWER is a blend of high-quality European linen and recycled polyester.

The recycled polyester is from the waste produced while spinning and cutting the material in the polyester factory.

By blending the polyester to linen, the flaws of linen can be improved. The flexibility of 100% linen is low, and polyester gives the yarn a moderate flexibility which can reduce problems such as the breakage of yarn while producing during dry seasons.

Furthermore, the flexibility can prevent wrinkles on garments. Depending on the tension of the material, the shrinkage can be improved when washing by hand.

Also, the yarn has some further features, such as UV protection, moisture absorption and quick dry.
