

# SPOERRY ICE COTTON

## COUNT

- Nm 1/60 S
- Nm 1/60 Z

## COMPOSITION

- COTTON 100%

## GAUGE

- 14G-1P
- 16G-1P
- 18G-1P

## TYPE OF YARN

- STRAIGHT
- SINGLE
- SKEWED

## COLOR STOCKS

- ALL COLOR STOCK SERVICE
- OWN COLOR MINIMUM:3KG

## DESCRIPTION

The world advanced Swiss yarn producer Spoerry 1866 develop high twisted yarn, SPOERRY ICE COTTON. This is the functional and ecological yarn for exclusive textile creations.

Special properties:

- Cool to the touch effect
- Free from harmful allergenic chemicals
- Positive contribution to the ecological balance
- Natural silken sheen
- Clear weave pattern
- Easy care

This quality is stocked in single twist, S and Z.

【Information to prevent snarl of the yarn for SZ twisted yarn.】  
It is important to knit at a slow speed with tension.

Due to the SZ twist, snarl may occur while knitting.

Without adequate tension this snarl will affect the stitches and will result in inconsistent fabric.

To prevent this:

1) Maintain constant tension on the yarn and knit at a reduced speed.

2) When the tension is loose, the yarn will collapse

※Cover the cone with a net

※Attach a snarl prevention device/attachment.

(Depending on the production facility, there is no specific attachment we recommend. However, please do make measures to prevent this)

※For instance adding another tension source between the yarn guide and side tension.

(This can be done by winding the yarn around a bar attachment once before feeding the side tension. It will reduce the possibility of snarls by restraining deflection. Having two of these attachments can increase stability.)
